

Company: Cesta Varazdin d.d.
Location: Varazdin, Croatia

Objective Restoration of a former gravel pit for a recreational purpose.

Context Cesta Varazdin is one of the leaders and largest asphalt products manufacturers in the Republic of Croatia.

Solution The exploitation continues 200 meters further to the restored area.
The company made all infrastructures for recreational and sport: beach, grass, etc.
They then sold the land to a touristic company which manages now the site.

Result The site, now called “Aquacity“, is now the main touristic place for the city of Varazdin and its surroundings.
There are numerous activities for entertainment (swimming area, catering facilities, fishing, tennis, playgrounds, etc.) and the beach has been an “international blue flag” for many consecutive years.
The exploitation still continues a bit further away.
