

Company: Carrières et Ballastières de Normandie – EUROVIA
Location: Yville-sur-Seine gravel extraction area, France

Objective The alliance of environmental engineering and public works to recreate ecosystems

Context Since the end of the 1990s, the Yville-sur-Seine gravel extraction site is operated by Carrières et Ballastières de Normandie (CBN). The Yville-sur-Seine site is a rich ecosystem where the quarrying operations of the CNB have been taking place for the last 20 years.

Actions Consultation with scientists, public stakeholders, local associations and specialised public work companies.
Recreation of the ecosystem through environmental engineering

Result Increase and recreation of biodiversity in the gravel extraction area.
Higher population of life form inhabitants.

Partners ECODIV laboratory
